

Salt Pools Pty Ltd

With limited space in their courtyard, the homeowners of this property in Camberwell wanted a modern, stylish pool that did not need to be enclosed with fencing. By constructing this stunning project out of the ground, Salt Pools has created a stand-out design that holds its own within the small space.

The 5m x 3.9m concrete pool is fully tiled with a bluestone wet-edge deck. In keeping with the home's contemporary feel, bluestone has also been utilised for the pool's coping and paving, which ties-in seamlessly with its surrounds.

All of the pool's equipment is set with timers, which means it only runs when needed. A Paramount in-floor cleaning system and sand filter ensures the pool is useable throughout the seasons, while energy-efficient solar heating warms the water during sunny weather. To complete the look, two Spa Electrics LED lights illuminate the structure to create a truly beautiful and inviting pool.

Salt Pools is owned and operated by Richard Workman. A licensed builder of swimming pools with the Victorian Building Authority (VBA) and a member of the Swimming Pool and Spa Association of Victoria (SPASA VIC), Workman has 25 years of industry experience.

The company specialises in concrete in-ground swimming pools, including plunge pools, infinity-edge pools and spas. Salt Pools offers clients a complete package, from design concepts to pool construction and landscaping.

Salt Pools works predominately in Melbourne's eastern suburbs, but also travels throughout Victoria, building approximately 20–40 pools annually.
