

SALT POOLS PTY LTD

PERSONALISED DESIGN

FIRST CLASS SERVICE AND CONSTRUCTION

The clean lines of the pool featured make it ooze elegance and class. It seamlessly ties in with the existing home, and is the centrepiece of this outdoor space's entertaining area – exactly what the homeowners requested.

The homeowners' brief was to modernise their backyard. As they're a retired couple they now do a lot of entertaining, and they wanted a pool which was low maintenance and which was family friendly for their grandchildren. They also requested a backyard which would tie in with the existing home.

This was achieved through many unique design features. An umbrella holder was incorporated into the top step of the pool, so that their grandchildren can swim and be outside without getting too much sun exposure. The landscaping created a fully functional entertaining area, and a backdrop of a retaining wall holds a beautiful garden area. To top it off, the pool uses an in-floor cleaning system and a self-cleaning VX7 salt chlorinator for less maintenance and more enjoyment.

The 8.5m x 3.75m concrete pool is fully tiled in Coulson blue tiles, and is centrally located within the entertaining area for practicality and ease of use. A water feature is positioned at the north end of pool, and it has a stainless steel spillway into the pool to increase aesthetics. A beautiful open pergola and surrounding paving was also incorporated to connect the home and outdoor space.
